Phase II MS4 Annual Report

for the

Stormwater Management Program Year 4 (January 1, 2022 – December 31, 2022) Permit Authorization Number: TXR040486

Texas Commission on Environmental Quality

March 2023

Prepared By

5237 N. Riverside Drive, Suite 100 Fort Worth, Texas 76137 (817) 336-5773

JOS 19450

A. General Information

Authorization Number: TXR040486

Report Year: 4

Annual Reporting Year: Calendar Year

Beginning and End Dates: January 1, 2022 – December 31, 2022

MS4 Operator Level: Level 1

Name of MS4/Permittee: City of Joshua

Contact Name: Mr. Michael Peacock, City Manager

Telephone Number: 817-558-7447

Mailing Address: 101 South Main Street Joshua, TX 76058

Email Address: mpeacock@cityofjoshuatx.us

A copy of the annual report was submitted to the TCEQ Region.

Region the annual report was submitted to: TCEQ Region 4.

B. Status of Compliance with MS4 GP and SWMP (Part IV Section B.2(a))

1. Provide information on the status of complying with permit conditions: (TXR040000 Part IV.B.2)

	Yes	No	Explain
Permittee is currently in compliance with the SWMP as submitted to and approved by the TCEQ.	X		BMPs have been met or progress has been made towards meeting the goal.
Permittee is currently in compliance with recordkeeping and reporting requirements.	×		Report is being submitted for Year 4 2022.
Permittee meets the eligibility requirements of the permit (e.g., TMDL requirements, Edward Aquifer limitations, compliance history, etc.).	×		Joshua meets the eligibility requirements of the permit.
Permittee conducted an annual review of its SWMP in conjunction with preparation of the annual report.	×		Joshua conducted an annual review of the City's SWMP.

2. Provide a general assessment of the appropriateness of the selected BMPs. Use table below or attach a summary, as appropriate:

мсм	ВМР	BMP is appropriate for reducing the discharge of pollutants in stormwater (yes or no). Explain.
1	Children's Programs	Yes, educating children on the impact of stormwater pollution can have long-term impacts towards stormwater pollution prevention.
1	Household Hazardous Waste (HHW) Program	Yes, this program can lead to a reduction in hazardous waste that can potentially enter the storm drain.
1	Lawn and Garden Education	Yes, proper lawn and garden practices can prevent grass clippings and leaves from entering the storm drain.
1	Media Coverage	Yes, media coverage raises citizen awareness of stormwater pollution and what they can do to reduce pollution.
1	Pet Waste Management	Yes, teaching residents to pick up after their pets can decrease the amount of bacteria entering local waterways.
1	Recycling Program	Yes, the program can reduce the amount of trash entering landfills, which can lead to improved water quality.
1	Stream Cleanup	Yes, this program reduces the amount of trash in streams in the City.
1	Storm Drain Stenciling	Yes, a marker on the storm drains will remind residents that storm drains discharge directly to creeks and streams. This can prevent dumping and discharge of pollutants into the storm drain.
1	SWMP Annual Review	No, however, it is important review the program annually to ensure program is clear, specific, and measurable.
2	Illicit Discharge Ordinance	Yes, by allowing the City to enforce rules on non-stormwater discharges and illegal dumping, stormwater pollution can be reduced or prevented.
2	Storm Drainage Outfall Map	Yes, the map allows the City to easily track the source of an illicit discharge if it occurs.
2	Education & Training on Illicit Discharges	Yes, educating the City staff on identifying and taking corrective actions can eliminate future illicit discharges.
2	Public Reporting and Response Procedures	Yes, enabling citizens to report illicit discharges is very important for the City to locate and address the discharges in a timely manner.
2	Source Investigation & Elimination	Yes, determining the source of an illicit discharge is important in order to begin corrective actions and eliminate future discharges.

мсм	ВМР	BMP is appropriate for reducing the discharge of pollutants in stormwater (yes or no). Explain.
3	Erosion and Sediment Control Ordinance	Yes, by allowing the City to enforce erosion and sediment control on construction sites, pollutants from stormwater runoff are reduced.
3	Construction Plan Review Procedures	Yes, the plan review ensures that future construction sites will have correct and adequate erosion and sediment control BMPs in place. This reduces the likelihood of stormwater pollution.
3	Construction Site Inspection & Enforcement	Yes, performing the site inspections will ensure proper installation and maintenance of erosion and sediment controls and reduce transport of sediment load.
3	Construction Stormwater Training	Yes, stormwater pollution can be reduced by properly training inspectors to identify, report, and correct improper erosion control practices on construction sites.
3	Construction Site Stormwater Education	Yes, educating contractors on BMPs to use on construction sites reduces the amount of pollutants in stormwater discharge from construction sites.
4	Post-Construction Ordinance	Yes, the ordinance allows the City to enforce post-construction runoff control measures to promote long-term reducing in stormwater pollution.
4	Long-Term Maintenance of Post-Construction BMPs	Yes, developing long-term operation and maintenance requirements ensures that post-construction BMPs will be maintained according to the City's criteria.
5	Facility & Stormwater Control Inventory	No, however it is important to identify City-owned facilities and stormwater controls in order to establish pollution prevention measures and sources of pollution.
5	Municipal Employee Training Program	Yes, by training employees to identify, and properly record, and respond to any illicit discharges or illegal dumping around the city, stormwater pollution be reduced.
5	Contractor Requirements & Oversight	Yes, the contractual requirements ensure that contractors are using appropriate control measures and standard operating procedures that actively reduce stormwater pollution when working within the MS4.
5	Municipal Operation & Maintenance Activities	Yes, the program identifies possible pollutants and remediation to limit or prevent pollutant runoff.

3. Describe progress towards achieving the goal of reducing the discharge of pollutants to the MEP. If no progress was made or the BMP did not result in a reduction in pollutants, provide an explanation.

мсм	ВМР	Information Used	Quantity	Units	Does BMP Demonstrate a Direct Reduction in Pollutants? (yes or no, explain)
1	Children's Programs	Number of Educational Materials Distributed	100	Educational Materials	No, but educating the youth on stormwater pollution is an important part of the stormwater program.
1	Household Hazardous Waste (HHW) Program	Educational Post	1	Facebook Post	No, but educating the public about stormwater pollution from hazardous wastes is an important part of the stormwater program.
1	Lawn and Garden Education	Flyers Distributed	176	Flyers	No, however educating the public about proper lawn and garden practices can lead to a reduction of stormwater pollution.
1	Media Coverage	Educational Post	5 1	Facebook Post Newsletter	No, but educating the public about stormwater pollution is paramount to a successful program and raises awareness of stormwater pollution.
1	Pet Waste Management	Flyers Distributed	17	Flyers	No, but educating the public about proper pet waste disposal can lead to a reduction on stormwater pollution
1	Recycling Program	Frequency	1	x Week	No, but a recycling program can reduce trash to the landfill which can reduce the propensity for stormwater pollution.
1	Stream Cleanup Event	Cleanup Events	1	Event	Yes, by directly removing debris and solids that would otherwise remain in the stream.
1	Storm Drain Stenciling	Number of Inlets Inspected	5	Inlets	No, but the program reinforces to residents that anything entering the storm drain discharges directly to creeks, which can ultimately lead to more awareness and reductions in pollutant discharges.
1	SWMP Annual Review	BMPs Reviewed	25	BMPs	No, however, reviewing the program and BMPs annually ensures the program is complaint with TPDES permit.

мсм	ВМР	Information Used	Quantity	Units	Does BMP Demonstrate a Direct Reduction in Pollutants? (yes or no, explain)
2	Illicit Discharge Ordinance	Illicit Discharge Inspections	0	Inspections	No, but regulating illegal dumping and illicit discharges prevents pollutants from entering the stormwater.
2	Storm Drainage Outfall Map	Outfalls Mapped	100%	Outfalls Mapped	No, but the BMP allows staff to easily track and address illicit discharges.
2	Education & Training on Illicit Discharges	Number of Attendees	1	Attendees	No, but providing educational information allows the staff to identify and take corrective actions on illicit discharges.
2	Public Reporting and Response Procedures	Illicit Discharge Reported	0	Reports	No, but it provides a mechanism for residents to contact the City if illicit discharge are noticed. Contact info has been included on the City's webpage.
2	Source Investigation & Elimination	Potential Illicit Discharges	0	Potential Illicit Discharges	No, but it is important that the City follows proper procedures for addressing the source of an illicit discharge to prevent any future illicit discharges.
3	Erosion & Sediment Control Ordinance	Construction Inspections	5	Sites	No, but creating regulations that govern practices on construction sites reduces the amount of pollution in the storm drains and receiving waterbodies.
3	Construction Plan Review Procedures	Construction Plans Reviewed	3	Construction Plans	No, but it is important the City have proper review procedures to ensure that construction sites are enacting appropriate pollutant reducing BMPs.
3	Construction Site Inspection & Enforcement	Construction Inspections	5	Sites	No, but it is important for the City to have proper inspection procedures to ensure the construction sites are complying the City's Erosion and Sediment Control Ordinance.
3	Construction Stormwater Training	Number of Attendees	13	Attendees	No, but it is important that inspectors be trained such that they can identify and correct improper erosion control practices and prevent stormwater pollution from construction sites.

мсм	ВМР	Information Used	Quantity	Units	Does BMP Demonstrate a Direct Reduction in Pollutants? (yes or no, explain)
3	Construction Site Stormwater Education	Number of Brochures Distributed	0	Brochures	No, but educating contractors about proper construction stormwater pollution prevention techniques can reduce the amount of pollutants in stormwater runoff.
4	Post- Construction Ordinance	Number of Post- Construction Violations	2	Inspections	No, but requiring developers to install post-construction runoff control measures reduces the long-term amount of pollution from the site.
4	Long-Term Maintenance of Post- Construction BMPs	Maintenance Plans Implemented	0	Maintenance Plans	Yes, developing long-term operation and maintenance requirements ensures post-construction BMPs will be maintained according to the City's criteria.
5	Facility & Stormwater Control Inventory	Number of Stormwater Controls	8	Stormwater Controls	No, however it is important to identify City-owned facilities and stormwater controls in order to establish pollution prevention measures and sources of pollution.
5	Municipal Employee Training	Number of Attendees	13	Attendees	No, but training employees to be cognizant of and report stormwater issues is important so that stormwater pollution may be prevented or reduced.
5	Contractor Requirements and Oversight	Number of New Contractual Agreements	1	New Contractual Agreements	No, but implementing contractual requirements and oversight ensures that MS4-hired contractors are accountable to the MS4's pollution reduction goals.
5	Municipal Operations and Maintenance Activities	Facilities Inspected	5	Facilities	No, however performing the assessment on municipal operations and maintenance activities identifies possible pollutants and will help develop standard operating procedures to reduce and minimize pollutant discharges.

4. Provide the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals.

мсм	Measurable Goal	Success
1	A minimum of 20% of all schools (k-5) will be educated every year on stormwater pollution by providing local schools in the City with materials, including brochures, coloring books, and other media.	Met Goal. The City of Joshua distributed 100 educational "Take Care of Texas" coloring books to the Punkin Patch Daycare Center.
1	Provide at least two educational post about household hazardous wastes and events through the City website and Facebook.	Met Goal. The City of Joshua advertised the household hazardous waste event on the City's Facebook page and newsletter.
1	Provide at least one household hazardous waste events a year.	Met Goal. The City provided a Household Hazardous Waste event April 30, 2022.
1	Annually, provide at least two educational post to residents about lawn and garden through the City website and Facebook.	Met Goal. The City provided two educational Lawn and Garden brochures on the City's website.
1	Annually, distribute informational brochure at one City events.	Exceeded Goal. The City distributed 176 lawn and garden informational brochure to both the Spring and Fall Cleanup event.
1	Provide stormwater information on the utility bill and City newsletter at least once a year.	Met goal. The City of Joshua provided a stormwater message on the City's utility bill for the month of September.
1	Provide regular tips about protecting stormwater quality on social media at least twice a year.	Exceeded goal. The City provides information about stormwater events and tips on social media, newsletter, and the City's website.
1	Post annual reports on City's website no later than 30 days after the due date.	Did not meet goal. The City is in the process of providing the annual reports on the City's website.
1	Provide at least two educational post to residents about proper pet waste disposal through the City's Newsletter and Facebook.	Did not met goal. The Town provides pet waste education on the City's website, but did not provide a post on Facebook.
1	Distribute informational brochure at two City events every year.	Exceed Goal. The City distributed 176 pet waste informational brochure to both the Spring and Fall Cleanup event.

мсм	Measurable Goal	Success
1	City will provide recycling for residents at once a week.	Met goal. The City of Joshua continues to provide recycling to residents once a week.
1	Provide at least two educational post to residents about recycling through the City website and Facebook.	Exceeded goal. The City provides 3 recycling brochure and tips on the City's website.
1	Advertise the event on the City website, through the newsletter and any other means.	Met goal. The City advertised the Stream Cleanup event to invite residents to participate.
1	Hold at least one stream cleanup event per year.	Met goal. The City of Joshua held the stream cleanup event on November 10, 2022.
1	Inspect and maintain as needed for 20% of stenciled inlets.	Met goal. The Town of Joshua stenciled 5 inlets for Year 4.
1	Annually review SWMP to ensure compliance.	Met goal. The Town reviewed the program and deemed a few changes necessary.
2	Conduct 100% of illicit discharge inspections.	Met goal. There was no illicit discharges reported for Year 4.
2	Investigate 100% of illicit discharges reported.	Met goal. There was no illicit discharges reported for Year 4.
2	Annually update the storm drainage system map as necessary.	Met goal. 100% of the outfalls have been mapped.
2	Provide annual IDDE training at least once a year for designated City staff and new hires.	Met goal. A City employee completed stormwater permit compliance training for Year 4.
2	Investigate 100% of illicit discharge complaints or reports received.	Met goal. The City did not receive complaints or reports of illicit discharges.
2	Conduct 100% of illicit discharge inspections	Met goal. The City did not receive complaints or reports of illicit discharges.
2	Investigate 100% of illicit discharges reported.	Met goal. The City did not receive complaints or reports of illicit discharges.
3	Inspect 100% of construction sites each year.	Met goal. For Year 4, the City of Joshua conducted construction inspections at 5 various sites.
3	Inspect 100% of complaints driven site each year.	Met goal. The City investigate 100% of construction complaints.

мсм	Measurable Goal	Success
3	Administer the construction plan review process for 100% of new regulated construction projects.	Met goal. The City administered construction plan review to three construction projects.
3	Inspect 100% of construction sites each year.	Met goal. The City inspected 5 active construction sites.
3	Inspect 100% of complaints driven site each year.	Met goal. The City inspected 100% of complaint driven sites this year.
3	Conduct annual construction stormwater training at least once a year for designated City staff and new hires.	Met goal. A total of 13 employees attended Construction Stormwater training.
3	Provide construction site erosion control education guideline to 100% of contractors and homebuilders at preconstruction meetings or with the building permit.	Met goal. The City provides construction brochures to contractors and homebuilders at preconstruction meetings.
4	Investigate 100% of post-construction violations or complaints.	Met goal. The City did not receive any post- construction complaints, but actively inspects City- owned detention ponds.
4	Implement maintenance plans for 100% of new owners or operators once post- construction BMPs is installed.	Met goal. No new post-construction BMPs have been installed, but the City will implement maintenance plan once BMPs are installed.
5	Maintain an inventory of City-owned and operated facilities and stormwater controls and update as necessary.	Met goal. The City maintained an inventory of City-owned and operated facilities.
5	Provide annual municipal employee training at least once a year for designated staff and new hires.	Met goal. A total of 13 employees attended Municipal Employee training.
5	Implement contract requirements to 100% of new contractors.	Met goal. There were no new contractors this year.
5	Maintain contracts with current contractors and revise as necessary.	Met goal. The City implemented 1 new contractual requirement with a contractor.
5	Inspect 100% of municipal operations and facilities once a year.	Met goal. The City conducted inspection for 100% (5) municipal facilities.

C. Stormwater Data Summary (Part IV Section B.2. (b))

1. Provide a summary of all information used, including any lab results (if sampling was conducted) to assess the success of the SWMP at reducing the discharge of pollutants to the MEP.

The following BMPs were used to evaluate the success of the SWMP at reducing pollutants to the maximum extent practicable.

- Public Reporting & Response Procedures
 - The City actively encourages, tracks, and responds to residents' observations of illicit discharges. While this does not require City forces to actively monitor, it allows for more "boots on the ground", more visual coverage, and city awareness and response.
- Source Investigation and Elimination
 - The City has developed written procedures for responding to illicit discharges including inspections, investigations, and corrective actions. Additionally, City staff that are routinely exposed to pollutant sources are trained to monitor and observe conditions as part of their day-to-day operations.
- o Construction Site Inspections and Enforcement
 - This BMP requires city stormwater personnel to be actively monitoring construction sites for stormwater pollutants.
- Municipal Operation and Maintenance Activities
 - Observing the municipal operations and maintenance activities identifies possible pollutants that can be discharged into storm drains. In future years, the City has identified a BMP that will define monitoring and inspection frequencies which will result in active monitoring and observance of potential pollution.

D. Impaired Waterbodies (Part IV Section B.2. (c))

- Identify whether an impaired water within the permitted area was added to the latest EPAapproved 303(d) list or the Texas Integrated Report of Surface Water Quality for CWA Sections 305(b) and 303(d). List any newly-identified impaired waters below by including the name of the water body and the cause of impairment.
 - The main receiving streams within The City of Joshua are Buffalo Creek and Village Creek (#0828A). The state classified water body that ultimately receives the discharge from Joshua is Lake Arlington (#0828). While these waterbodies are not located within a TMDL watershed, Village Creek is listed as impaired on the TCEQ 2014 303d Impaired Waterbodies List for bacteria. The City of Joshua has implemented BMPs specifically targeting bacteria, including Pet Waste Management, Illicit discharge Ordinance, and Stream Cleanups. The City will determine the effectiveness of these BMPs throughout the permit term and make any changes as needed.

2. If applicable, explain below any activities taken to address the discharge to impaired waterbodies, including any sampling results and a summary of the small MS4's BMPs used to address the pollutant of concern.

- Not applicable. The City of Joshua discharges into an impaired water body (Village Creek) without an approved TMDL by TCEQ and EPA.
- 3. Describe the implementation of targeted controls if the small MS4 discharges to an impaired water body with an approved TMDL.

• Not applicable. The City of Joshua discharges into an impaired water body (Village Creek) without an approved TMDL by TCEQ and EPA.

4. Report the benchmark identified by the MS4 and assessment activities:

- Not applicable. The City of Joshua discharges into an impaired water body (Village Creek) without an approved TMDL by TCEQ and EPA.
- 5. Provide an analysis of how the selected BMPs will be effective in contributing to achieving the benchmark:
 - Not applicable. The City of Joshua discharges into an impaired water body (Village Creek) without an approved TMDL by TCEQ and EPA.

6. If applicable, report on focused BMPs to address impairment for bacteria:

Description of bacteria-focused BMP	Comments/Discussion
Pet Waste Management	Informing residents above picking up after their pets can decrease the amount of bacteria entering local waterways.
Stream Cleanup	This program reduces the amount of trash in the local waterways.
Source Investigation and Elimination	The City has developed written procedures for responding to illicit discharges including inspections, investigations, and corrective actions. Additionally, City staff that are routinely exposed to pollutant sources are trained to monitor and observe conditions as part of their day-to-day operations.

7. Access the progress to determine BMP's effectiveness in achieving the benchmark.

• Not applicable. The City of Joshua discharges into an impaired water body (Village Creek) without an approved TMDL by TCEQ and EPA.

E. Stormwater Activities (Part IV Section B.2. (d))

Describe any stormwater activities the MS4 operator has planned for the next reporting year.

МСМ	BMP	Stormwater Activity	Description/Comments
1	Children's Programs	Distribute educational material to local elementary and middle school.	The City will continue to distribute educational material to local schools.
1	Household Hazardous Waste (HHW Program)	Provide at least two educational post about household hazardous wastes and events through the City website and Facebook.	The City will provide educational post about household hazardous waste and events through social media.
1	Household Hazardous Waste (HHW Program)	Provide at least one household hazardous wastes events a year.	The City will continue to provide this service to City residents.
1	Lawn and Garden Education	Annually, provide at least two educational post to residents about lawn and garden through the City website and Facebook.	The City will continue to provide lawn and garden education through social media.
1	Lawn and Garden Education	Annually, distribute informational brochure at 1 City event.	The City will provide educational material about proper lawn and garden practices.
1	Media Coverage	Provide stormwater information on the utility bill and City newsletter at least once a year.	The City will continue to post information about the SWMP and stormwater on the utility bill or City newsletter.
1	Media Coverage	Provide regular tips about protecting stormwater quality on social media at least twice a year.	Provide stormwater tips on social media.
1	Media Coverage	Post annual reports on City's website no later than 30 days after the due date.	The City will post the annual report no later than 30 days after the due date.

МСМ	BMP	Stormwater Activity	Description/Comments
1	Pet Waste Management	Provide at least two educational post to residents about proper pet waste disposal through the City's Newsletter, Facebook, and Twitter.	The City will provide educational material to inform residents about proper pet waste disposal.
1	Pet Waste Management	Distribute informational brochure at one City events every year.	The City will provide pet waste stations at City events.
1	Recycling Program	City will provide recycling for residents at once a week.	The City will continue to provide recycling program to residents.
1	Recycling Program	Provide at least two educational post to residents about recycling through the City website and Facebook.	The City will continue to educate residents about recycling through social media.
1	Stream Cleanup Event	Advertise the event on the City website, through the newsletter and any other means.	The City will advertise the stream cleanup event through any means.
1	Stream Cleanup Event	Hold at least one stream clean up event per year	The City will hold at least one stream clean up event per year.
1	Storm Drain Stenciling	Inspect and maintain as needed for 20% of stenciled inlets.	The City will continue to mark 20% of its inlets each year.
1	SWMP Annual Review	Annually review SWMP to ensure compliance.	The City review the SWMP annually to ensure compliance.
2	Illicit Discharge Ordinance	Conduct 100% of illicit discharge inspections.	The City will inspect 100% of illicit discharge inspections.
2	Illicit Discharge Ordinance	Investigate 100% of illicit discharges reported.	The City will investigate 100% of illicit discharges reported.
2	Storm Drainage Outfall Map	Annually, update the storm drainage system map as necessary.	The City will annually update the storm drainage system.

MCM	BMP	Stormwater Activity	Description/Comments
2	Education and Training on Illicit Discharges	Provide annual IDDE training at least once a year for designated City staff and new hires.	The City will provide illicit discharge training for pertinent City staff and document attendees and training materials used.
2	Public Reporting and Response Procedures	Investigate 100% of illicit discharge complaints or reports received.	The City will continue to investigate illicit discharge complaints or reports received.
3	Source Investigation and Elimination	Conduct 100% of illicit discharge inspections.	The City will conduct 100% of illicit discharge inspections.
3	Source Investigation and Elimination	Investigate 100% of illicit discharges reported.	The City will investigate 100% of illicit discharges reported.
3	Erosion & Sediment Control Ordinance	Inspect 100% of construction sites each year.	The City will inspect 100% of construction sites each year.
3	Erosion and Sediment Control Ordinance	Inspect 100% of complaints driven site each year.	The City will inspect 100% of complaints driven site each year.
3	Construction Plan Review Procedures	Administer the construction plan review process for 100% of new regulated construction projects.	The City will continue to administer the review process for all new construction.
3	Construction Site Inspections and Enforcement	Inspect 100% of construction sites each year.	The City will administer the inspection and enforcement program and document construction site inspections and follow ups.
3	Construction Site Inspections and Enforcement	Inspect 100% of complaint driven site each year.	The City will inspect 100% of complaint driven site each year.
3	Construction Stormwater Training	Conduct annual construction stormwater training at least once a year for designated City staff and new hires.	The City will conduct construction stormwater training at least once a year.

МСМ	BMP	Stormwater Activity	Description/Comments
3	Construction Site Stormwater Education	Provide construction site erosion control education guideline to 100% of contractors and homebuilders at preconstruction meetings or with the building permit.	The City will continue to provide the construction brochure to contractors and homebuilders.
4	Post Construction Ordinance	Investigate 100% of post- construction violations or complaints.	The City will implement and enforce the newly adopted post-construction ordinance, and document and maintain any enforcement actions take.
4	Long-Term Maintenance of Post-Construction BMPs	Implement maintenance plans for 100% of new owners or operators once post- construction BMPs is installed.	The City will develop requirements for the long-term operation and maintenance of structural controls installed on the development sites.
5	Facility and Stormwater Control Inventory	Maintain an inventory of City-owned and operated facilities and stormwater controls and update as necessary.	The City will maintain an inventory of City-owned and operated facilities and stormwater controls.
5	Municipal Employee Training Program	Provide annual municipal employee training at least once a year for designated staff and new hires.	The City will hold a training program for the designated city staff and document with attendance signatures.
5	Contractor Requirements and Oversight	Implement contract requirements to 100% of new contractors.	The City will implement the oversight procedures and execute revised contractual agreements.
5	Contractor Requirements and Oversight	Maintain contracts with current contractors and revise as necessary.	The City will continue to maintain contracts with current contractors.
5	Municipal Operation and Maintenance Activities	Inspect 100% of municipal operations and facilities once a year.	The City will develop pollution prevention measures for municipal O&M activities and select inspection frequencies.

F. Stormwater Modifications (Part IV Section B.2.(e))

1. The SWMP and MCM implementation procedures are reviewed each year.

No

2. Changes have been made or are proposed to the SWMP since the NOI or the last annual report, including changes in response to TCEQ's review.

If "Yes," report on changes made to measurable goals and BMPs:

G. Additional BMPs (Part IV Section B.2.(f))

Provide a description and schedule for implementation of additional BMPs that may be necessary, based on monitoring results, to ensure compliance with applicable TMDLs and implementation plans.

• No additional BMPs are necessary for the City of Joshua at this time.

H. Additional Information (Part IV Section B.2.(g))

1. Is the permittee relying on another entitiy/ies to satisfy some of its permit obligations?

2.a. Is the named permittee sharing a SWMP with other entities?

Yes

Yes

2.b. If 'yes,' is this a system-wide annual report including information for all permittees?

I. Construction Activities (Part IV Section B.2.(h-i))

- The number of construction projects in the jurisdiction of the MS4 where the permittee was not the construction site operator (as provided in submittals to the MS4 operator via notices of intent or site notices)._____5_____
- 2. Does the permittee utilize the optional seventh MCM related to construction?

2.b. If 'yes' then provide the following info for this permit year:

The number of municipal construction activities authorized under this general permit	N/A
The total number of acres disturbed for municipal construction projects	N/A

J. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
